

Felipe Ferreira Ribeiro

AI Engineer | Full Stack Developer | LLMs, RAG and Process Automation

Pelotas, Rio Grande do Sul, Brazil | +55 53 99989-2980 | felipeferibeiro@gmail.com | linkedin.com/in/felipe-ferreira-ribeiro | github.com/Numenone

PROFESSIONAL SUMMARY

AI Engineer and Full Stack Developer working with Generative AI, Large Language Models (LLMs) and process automation. Experience building and orchestrating AI agents and RAG (Retrieval-Augmented Generation) pipelines with LangChain, LangSmith and Python, combined with full stack development in TypeScript, React, Vue, .NET/C# and PHP. Hands-on with relational and vector databases (PostgreSQL, MySQL, pgvector, ChromaDB), REST API integration, containers and infrastructure as code (Docker, Terraform, Google Cloud Platform), and workflow automation with n8n, Zapier, Make and GoHighLevel. Serves international clients in fluent English (C2 - EF SET). Currently pursuing a degree in Systems Analysis and Development at UniSenac RS.

PROFESSIONAL EXPERIENCE

IT & Automation Specialist | Saenz Global | Remote (United States) | 05/2026 - Present

- Owns the IT function of a US-based roofing company, handling systems, integrations and technical support for internal teams.
- Builds custom internal systems for the fulfillment and client relationship teams, centralizing data previously scattered across spreadsheets and disconnected tools.
- Designs and maintains process automations with n8n, Zapier, Make and GoHighLevel, integrating CRM, email and management tools through REST APIs and webhooks.
- Structures workflows and integrations across ClickUp, Slack and CRM (Zuper), reducing recurring manual work for operations teams.
- Acts as the technical point of contact between operations teams and stakeholders, documenting processes and training internal users.

Tech Stack: n8n, Zapier, Make, GoHighLevel, REST APIs, Webhooks, Python, JavaScript, ClickUp, Slack, Zuper, Google Workspace

AI Engineer & Full Stack Developer | BlisAI | Remote | 12/2025 - Present

- Builds and manages the platform's AI agent orchestration (multi-agent systems), including routing between specialist agents and defining the tools available to each agent.
- Develops RAG (Retrieval-Augmented Generation) pipelines querying multiple data sources, improving answer accuracy and reducing LLM hallucinations.
- Uses LangChain and LangSmith for orchestration, observability, evaluation and prompt versioning in production.
- Develops integrations and conversational flows for WhatsApp using Meta blueprints, as well as web-chat channels.
- Contributes to full stack development of company products with TypeScript, Python, .NET/C#, React, Vue, Vite and TailwindCSS.
- Standardizes environments and infrastructure with Docker and Terraform, with version control and code review via Git.

Tech Stack: Python, TypeScript, LangChain, LangSmith, RAG, .NET, C#, React, Vue, Vite, TailwindCSS, Storybook, Docker, Terraform, Meta API, WhatsApp API, Git

AI Developer (Independent Project / Freelance) | Prospheine | Remote (United States) | 01/2026 - Present

- Designed and built from scratch an AI platform that reads and analyzes emails, documents and projects for a US client in the real estate industry.
- Implemented a RAG pipeline with ChromaDB and pgvector vector databases, enabling semantic search across large document volumes.
- Developed the backend in Python and Flask, exposing REST APIs consumed by a TypeScript frontend.
- Integrated Google OAuth 2.0 for secure access to user mailboxes and Google Cloud Platform (GCP) for hosting and AI services.
- Defined data modeling, version control and end-to-end application deployment.

Tech Stack: Python, Flask, TypeScript, RAG, ChromaDB, pgvector, PostgreSQL, Google OAuth 2.0, Google Cloud Platform (GCP), REST APIs, Git

Full Stack PHP & WordPress Developer (Freelancer) | Create Sistemas | Remote | 08/2024 - 05/2026

- Developed systems, landing pages and complete websites in PHP (versions 5.4 to 8.1) and WordPress, with MySQL persistence and version control via Git.
- Managed a portfolio of international clients (e.g. JWBC) and prospected new contracts, contributing to 47% portfolio growth.

- Provided direct 24/7 technical support to clients, sustaining high satisfaction and low turnover.
- Handled data modeling and MySQL database administration for web systems.

Tech Stack: PHP, WordPress, JavaScript, jQuery, MySQL, Apache, Git

Customer Success & Onboarding Analyst (Freelancer) | HeadOffice.ai | Remote | 11/2025 - 02/2026

- Led onboarding and implementation of new accounts on Generative AI products, sustaining a 0% churn rate during the period.
- Applied Prompt Engineering to continuously refine AI agents, improving LLM response quality in production.
- Integrated LLM APIs (Gemini API and Meta API) to automate customer service workflows.
- Contributed to up-selling and cross-selling growth through improvements to client-facing AI agents.

Tech Stack: Generative AI, Prompt Engineering, Gemini API, Meta API, LLMs, REST APIs

Support Analyst | CIGAM Software de Gestão | Pelotas, Brazil | 02/2025 - 03/2025

- Administered PostgreSQL databases, running SQL queries and recurring backup and restore routines.
- Monitored data integrity and consistency across POS, back office and servers, with remote maintenance and POS versioning.
- Handled tickets via Movidesk, increasing the team's ticket throughput by 40%.
- Worked on Brazilian tax compliance (NCM, CFOP, XML, SEFAZ monitoring and invoice invalidation), with data validation and standardization in Excel.

Tech Stack: PostgreSQL, SQL, Movidesk, Microsoft Excel, SEFAZ

Support and Onboarding Analyst | chatlabs | Pelotas, Brazil | 06/2024 - 10/2024

- Ran onboarding for new clients and users via Zoom and Google Meet, including daily training sessions for medical clinics.
- Updated chatbot flowcharts for customer service automation, integrated through the WhatsApp API.
- Provided 24/7 technical support and contributed to internal projects using Next.js.

Tech Stack: Next.js, WhatsApp API, Chatbot, JavaScript

Operations Assistant | TeleAlarme Brasil | Pelotas, Brazil | 12/2023 - 06/2024

- Performed remote monitoring of alarm systems, cameras and vehicle trackers, following continuous operational routines.
- Monitored public and government institutions (schools, CORSAN, FIERGS), running remote maintenance and technician scheduling via Microsoft Excel.

Tech Stack: Microsoft Excel, Monitoring Systems

EARLIER EXPERIENCE

Office Assistant - Imobiliária Casario, Pelotas, Brazil (01/2023 - 04/2023) and Apprentice - Casarão Imóveis, Pelotas, Brazil (05/2021 - 03/2023). Administrative routines, lease contract drafting, client service and negotiation, document digitization and maintenance of the company website.

TECHNICAL SKILLS

Artificial Intelligence and LLMs: LangChain, LangSmith, RAG (Retrieval-Augmented Generation), Prompt Engineering, Multi-Agent Orchestration, Vector Databases, Gemini API, Meta API

Programming Languages: Python, TypeScript, JavaScript, C#, PHP, SQL

Frameworks and Libraries: Flask, Pandas, React, React Native, Next.js, Vue, Vite, .NET, Laravel, TailwindCSS, Bootstrap, jQuery, Storybook, WordPress

Databases: PostgreSQL, MySQL, MariaDB, pgvector, ChromaDB, Data Modeling, Backup and Restore, ETL

Cloud, DevOps and Infrastructure: Docker, Terraform, Google Cloud Platform (GCP), AWS Cloud Foundations, Git, GitHub, Apache, CI/CD

Automation and Integrations: n8n, Zapier, Make, GoHighLevel, REST APIs, Webhooks, Google OAuth 2.0, WhatsApp API, Microsoft Excel (VBA and Macros)

Tools and Business: ClickUp, Slack, Zuper, Movidesk, Jira, Remote Technical Support, Brazilian Tax Compliance (NCM, CFOP, XML, SEFAZ)

SOFT SKILLS

Analytical thinking, attention to detail, organization, technical autonomy, written and verbal communication, client-facing service, user training, negotiation, project management, remote and cross-cultural teamwork.

LANGUAGES

Portuguese (native) | English (fluent - C2, EF SET 73/100)

EDUCATION

Associate Degree in Systems Analysis and Development

UniSenac RS - Pelotas, Brazil | 01/2024 - 12/2026 (expected)

Academic Junior Enterprise Scholarship awardee.

CERTIFICATIONS

- EF SET English Certificate - 73/100 (C2 Proficient) - EF Standard English Test
- AWS Academy Graduate - Cloud Foundations - Amazon Web Services

PROJECTS AND PORTFOLIO

- Prosphene - <https://prosphe-ne-api-4rbc.onrender.com> | AI platform that reads and analyzes emails, documents and projects for a US real estate client. RAG pipeline with semantic search over large document volumes, Python/Flask backend exposing REST APIs, ChromaDB and pgvector vector databases, Google OAuth 2.0 authentication and deployment on Google Cloud Platform.
- SetRank - <https://setrank-btzd.onrender.com> | Competitive ranking platform with user authentication, match logging and automated scoring and leaderboard calculation.
- AutoU - <https://auto-u-eosin.vercel.app> | Web application for AI-based email classification and automated replies, built in Python with a web interface and continuous deployment.
